Product Code: GGCB0083

Crustbuster is designed to rapidly improve surface-crusting soils, enhancing soil structure and promoting healthier plant growth.

Benefits of Crustbuster™

- Calcium and Molasses help to flocculate (bind together) soil particles which leads to stable soil aggregates, improving soil structure and friability.
- Displaces sodium and magnesium, improving friability of crusting soils.
- Improves soil porosity
- Improve seedling establishment, helping avoid costly and risky resowing into crusting soils.
- Improves water infiltration.
- Aids in ameliorating soil pH.
- Contains biostimulants to enhance soil fertility and plant health.
- Nitrogen (N), specifically in its nitrate form, is readily available to plants and promotes healthy root development.

Guaranteed Analysis

Nitrogen (N)	7.8%
N as nitrate	7.8%
Calcium (Ca)	13.9%
Boron (B)	0.04%
Fulvic Acid	0.1%
Fish Hydrolysate	0.1%
Kelp	0.4%
Molasses	8.7%
Specific Gravity	1.400 kg/L
pH Range	3.0 - 6.0

Typical Application Rates

Direct Soil Application

70 to 100 L/ha Undiluted
