

# Assist in the Recovery of Water Logged Cotton

## Cotton Boost™

**Product Code:** SNPK0072

Cotton Boost contains a blend of 6 nutrients and 5 biostimulants in highly available forms. The product is designed not only to give the crop the nutrients it needs but also the natural bio-stimulants of QuadSHOT® to ensure the roots and leaves are activated to take up these nutrients.

The major and immediate effect of waterlogging is blocking the transfer of oxygen between the roots and the soil atmosphere. Root growth and the absorption of nutrients is decreased along with the availability of nutrients in the soil.

Waterlogging can also cause denitrification of soil mineral nitrogen, resulting in less nitrogen being plant available even after the flood event. Plant recovery will be assisted by supplying nitrogen directly to the leaves as a foliar spray.

### Guaranteed Analysis

Nitrogen (N)	17.4%
N as ammonium	3.9%
N as urea	13.5%
Phosphorus (P)	0.1%
Potassium (K)	0.1%
Sulphur (S)	5.0%
Zinc (Zn)	0.5%
Copper (Cu)	0.05%
Iron (Fe)	1.0%
Fulvic Acid	0.01%
Humic Acid	0.3%
Fish Emulsion	0.4%
Kelp	0.4%
Molasses	0.4%
Specific Gravity	1.21 - 1.22 kg/L
pH	3.5 - 5.5

### Typical Application Rates

#### Foliar Aerial

20 L/ha Cotton Boost  
30 L/ha water

#### Foliar Boom spray:

20 - 30 L/ha Cotton Boost  
50 - 70 L/ha water
