Maximise Your Crop's Potential

ZMnC + Mo Complex™

Product Code: GGCB0179

ZMnC + Mo Complex™ is a cost effective multi trace blend designed specifically for Wimmera - Mallee conditions.

Benefits of ZMnC + Mo Complex™

- Balanced four way trace element, designed for Mallee conditions
- Zinc is essential for carbohydrate metabolism and enzyme activation, deficiency symptoms include interveinal chlorosis and stunted crops
- Copper is essential for energy transfer and helps regulate water movement, deficiency may appear as tip burn in cereals
- Manganese is essential for chlorophyll production and photosyntheses. Deficiencies can be seen as chlorosis and may appear as small brown-black spots
- Can be used as a liquid injection or as foliar applied

For tank mixing compatibility with chemicals and other fertilisers please go to: <https://sltec.com.au/compatibility-request/>

Guaranteed Analysis (w/v %)

Sulphur (S)	6.9%
Manganese (Mn)	5.1%
Zinc (Zn)	6.3%
Copper (Cu)	1.5%
Molybdenum (Mo)	0.1%
Specific Gravity	1.310 kg/L
pH Range	2.0 - 2.8

Typical Application Rates

For use in Broadacre Systems:

Foliar:

1 to 2 L/ha

Liquid Injection:

1 to 5 L/ha
